

American Board of Criminalistics

Drug Analysis Certification Eligibility Requirements

Education:

The Applicant must possess a minimum of an earned baccalaureate degree, or equivalent, in a natural science (e.g., chemical, physical, or biological science) or forensic science from an accredited institution. Accredited institutions are those approved by regional accrediting commissions recognized by the U.S. Office of Education or foreign equivalent, and other institutions approved by the American Board of Criminalistics Board of Directors. At its discretion, the Board through its Credentials Committee may request documentation which certifies compliance with this requirement.

Professional Experience:

The applicant must be actively working in Criminalistics. Employment may include but is not limited to performing forensic casework for a forensic science service provider, teaching at a post-secondary (i.e., college) level, research, supervision, or management, etc.

The applicant shall possess a minimum of two years of full-time experience. Experience should be in the field in which the applicant is seeking certification. Experience may include:

- on-the-job training
- casework
- research
- 1-year of technician experience may be used towards the 2-year experience requirement
- Laboratory support personnel experience may not be counted towards the 2-year experience requirement

Applicants must provide an authorization to perform casework, or equivalent, in the area in which the applicant is seeking certification. The authorization to perform casework must be from a Forensic Science Service Provider.

ABC recognizes the following definitions:

Technician: employee who performs analytical techniques on forensic samples under the supervision of a qualified analyst. Technicians do not interpret data, reach conclusions on results, or prepare final reports.

Laboratory Support Personnel: employee or contract employee who performs laboratory duties exclusive of analytical techniques on forensic or database samples.

Forensic Science Service Provider: A FSSP, as defined by the National Commission on Forensic Sciences, is a forensic science service provider having at least one full-time analyst (however named) who examines physical evidence in criminal and/or investigative matters and provides reports or opinion testimony with respect to such evidence in United States courts of law. Forensic science service provider is used interchangeably with forensic laboratory.
